

### YammieAPI Instructions – Oz Hoge

1. Make sure Node.js and MongoDB are installed on your machine.
2. Run “npm install” to install required packages.
3. Run “mongo” to start the database (macOS users: if there is an error with mongo path folder - please follow the instructions in setMongoDBPath.txt file)
4. Run “npm run start” to start the server.
5. Run “npm run test” to start the unit test.
